

Ayomide Apeh

Abuja, Nigeria | +2348140982821 | aeyod7@gmail.com | linkedin.com/in/ayomideapeh

PROFESSIONAL SUMMARY

Final-year Geology student (B.Sc., Federal University Lokoja, expected Oct 2026) with multidisciplinary experience spanning GIS/remote sensing, UAV mapping, AI systems engineering, and blockchain development. Experienced in aerial data acquisition, geospatial analysis, AI-powered automation systems, and Web3 infrastructure. Has built and deployed production-ready automation workflows, contributed to emerging blockchain ecosystems, and delivered geospatial solutions for mapping and spatial analysis projects. Combines strong analytical thinking, rapid execution, and a builder-first mindset to create scalable solutions across geospatial technology, automation, and decentralized systems.

EXPERIENCE

Founder & Lead Developer — Arc Pay (arcpay.com)

2026 – Present

- Architecting Arc Pay, a USDC stablecoin payment infrastructure platform on Arc Network, targeting invoice and receipt generation as a core infrastructure layer for the Arc ecosystem.
- Built a full Next.js 15 TypeScript frontend spanning 13+ pages
- Developed a TypeScript @arcpay/sdk package, viem-based USDC Transfer event watcher, Clerk auth integration, Svix webhooks, and a 9-point payment verification checkout flow.
- Conducted a full security audit of the payment verification flow; prepared structured multi-phase product expansion specifications for AI-assisted development handoff.

Freelance Automation Engineer & AI Systems Builder

2026 – Present

- Built a production Instagram automation service using a Telegram bot, Cloudinary, and the Instagram Graph API deployed on a VPS — pitched and sold as a scalable managed service to business clients.
- Engineered the geology project guide, a free offline-capable static HTML tool for Federal University Lokoja geology students.

Geospatial Analyst Intern — EIB Stractoc Limited, Abuja

2025 – 2026

- Conducted GIS and remote sensing analysis using ArcGIS Pro, ArcMap, QGIS, and ENVI for spatial intelligence deliverables.
- Processed drone-acquired orthomosaics (DEM/DTM, NDVI, point clouds) to support environmental and infrastructure surveys.
- Integrated geospatial AI pipelines (SAM 2, GroundingDINO, YOLOv8-seg) into the GISS desktop application for automated feature digitization from GeoTIFF imagery.
- Prepared satellite imagery and GeoJSON datasets for Abuja sites for training and validation of ONNX/PyTorch inference models.

EDUCATION

B.Sc. (Hons) Geology — Federal University Lokoja

November 2021 – October 2026 (Expected)

PROJECTS

GISS — Geospatial Intelligence Support System

Windows desktop app · PySide6, Python, ONNX/PyTorch, GeoJSON, CUDA

- Offline-capable GIS desktop application for auto-digitizing features from GeoTIFF orthomosaics using a local NVIDIA GPU.

- Integrates SAM 2, GroundingDINO, and YOLOv8-seg inference with a PySide6 GUI featuring Geometry Type Controller, Feature Properties Editor, GeoJSON Preview, Topology/Snapping panel, and Training Coverage tab.
- Paired with a seven-file markdown knowledge base derived from the GeoAI with Python book for structured AI-assisted development.

Arc Pay — Stablecoin Payment Infrastructure

arcpay.com · Next.js 15, TypeScript, viem, Clerk, Svix, Arc Network

- End-to-end USDC payment platform with public checkout, invoice/receipt generation, and a developer SDK (@arcpay/sdk) targeting the Arc ecosystem.
- 9-point onchain payment verification, viem-based event watcher, Clerk auth, Svix webhooks, and a full 13+ page frontend.

TECHNICAL & PROFESSIONAL SKILLS

GIS & Remote Sensing: ArcGIS Pro, ArcMap, QGIS, ENVI, Orthomosaics, NDVI, DEM/DTM, Point Clouds, Leaflet

AI & Geospatial ML: SAM 2, GroundingDINO, YOLOv8-seg, ONNX, PyTorch, OpenCV, CUDA Inference, GeoAI Pipelines

Programming Languages: TypeScript, JavaScript (ES6+), Python, Node.js, SQL

Frontend: React, Next.js 15, Tailwind CSS, Framer Motion, Leaflet

Backend & APIs: Node.js, Express.js, FastAPI, REST APIs, Telegram Bot API, Instagram Graph API, Cloudinary

Databases: PostgreSQL, MongoDB, SQLite

DevOps & Tools: Git/GitHub, Docker, VPS Deployment, Vercel, Netlify, Postman, Figma

Other: DaVinci Resolve, Canva, Prompt Engineering, AI Workflow Design

LANGUAGES

English — Fluent
